EMPLOYMENT HISTORY

Go back 10 years or to your 16th birthday. Start with your current or most recent and work back in time. If you have not worked for periods of time, you will mark that time as unemployed even if you are a student. It's important that there are no gaps in dates, you were either employed or unemployed.

MEDICAL RECORD	Report on Consent for Cerumen (Ear Wax) Removal or Continuation of S.F. (Strike out one line) (specify type of examination or data)

PRIVACY ACT STATEMENT: This information is subject to the Privacy Act of 1974 (5 U.S.C. Section 552a). This information may be provided to appropriate Government agencies when relevant to civil, criminal or regulatory investigations or prosecutions. The Social Security Number, authorized by Public Law 93-579 Section 7 (b) and Executive Order 9397, is used as a unique identifier to distinguish between individuals with the same names and birth dates and to ensure that each individual's record in the system is complete and accurate and the information is properly attributed.

Reason for Procedure: During the accession medical evaluation at the Military Entrance Processing Station (MEPS) the applicant may be found to have cerumen, also known as “ear wax” that limits MEPS medical provider’s ability to see their tympanic membrane (ear drum). Cerumen forms naturally in the ear canal. Its purpose is to protect the ear by trapping dust and other particles from entering the ear. The wax usually makes its own way to the ear opening where it is washed away. Some people seem to produce more wax than others. The cerumen must be removed to allow MEPS medical provider to completely examine and visualize internal structures of the ear as required, in order to complete the accession medical examination.

Procedure: The cerumen (ear wax) removal procedure is performed by trained MEPS medical personnel. The cerumen may be removed by ear irrigation (ear wash). The ear is gently irrigated with a solution of warm water and hydrogen peroxide, to help flush out the obstructing cerumen. If the MEPS medical personnel are not able to flush the ear wax during an initial attempt, they will place a few drops of 6.5% carbamide peroxide solution to help soften the ear wax in preparation for a second irrigation attempt. Irrigation continues until the ear wax is removed or the applicant or provider requests that the irrigation stop. Some MEPS medical providers may choose to accomplish the cerumen removal procedure using a specially designed scoop-shaped instrument called ear curette. This is known as direct external canal curettage. Under direct visualization, the MEPS medical provider will attempt to gently scrape or scoop out the ear wax with a curette.

Benefits: Cerumen (ear wax) removal at the MEPS allows the applicant to complete all requirements of the medical examination on the same day and avoids delays by scheduling additional consultation visit to a contracted Ear, Nose, and Throat (ENT) provider or the applicant’s health care team of choice in order to remove the cerumen.

Risks: Cerumen removal procedure is safe and the chance of complications is rare. However, there are a few adverse events that may be associated with the ear irrigation or direct external canal curettage. These medical procedures involve risks including, but not limited to, ear drum perforation (hole), ear pain, vertigo (whirling sensation), external ear canal trauma, otitis externa (infection of the ear canal), skin abrasion/laceration (bleeding in the ear canal), skin irritation of the ear canal, discomfort, transient hearing loss, dizziness and nausea, or infection. Additionally, each person reacts differently to Ear Irrigation/Direct External Canal Curettage, therefore, the results of this medical procedure may vary.

Alternatives: The applicant may choose not to have the obstructing cerumen removed at the MEPS, if the applicant or their parent/guardian does not sign this form, the cerumen removal procedure will not be performed. If the MEPS medical provider finds obstructing ear wax, they will order a MEPS-directed consultation with a contracted ENT provider to remove the cerumen (ear wax), or the applicant and/or their parent/guardian may choose to follow up with the applicant’s health care team of choice.

Before cerumen removal can be performed at the MEPS, the following questions must be answered:

	YES	NO
1. Has the applicant ever had “tubes” inserted in their ear drum(s)?		
2. Has the applicant ever had a ruptured ear drum(s) or hole in their ear drum(s)?		
3. Has the applicant ever had a cleft lip (harelip), cleft palate, or surgery to correct a cleft lip or cleft palate?		
4. Has the applicant had recent (within 90 days) ear ache/pain, ear infection, or ear discharge?		
5. Has the applicant ever had “swimmer’s ear” or an infection of the ear canal after swimming?		

Any “YES” answers will be discussed with the applicant prior to starting the cerumen removal process.
